EXTENSION UPDATES

4-H'ers participate in Capital District 4-H Tractor Safety 2020 Tractor Safety program had to adapt due to the COVID-19 pandemic

17 teens from across the Capital Region completed the NSTOP Tractor Safety Program offered by the 4-H Youth Development Program. This intensive course requires youth to demonstrate knowledge and skills related to safely working within the agriculture industry. The certification that is earned is needed for youth ages 14-15 to operate certain types of machinery while being employed in the agricultural field.

The 2020 Tractor Safety program had to adapt due to the Covid-19 pandemic, with much of the programming taking place in a

virtual space. The youth participated in an online learning environment, and even had the opportunity to practice and demonstrate equipment operation while observing all necessary safety guidelines...[read more.](#)

Throw your gloves in the trash and not in the street, parking lot, or sidewalk

Stormwater is water from rain or melting snow that doesn't soak into the ground but runs off into waterways. It flows from rooftops, over paved areas and bare soil, and through sloped lawns while picking up a variety of materials on its way. When plastic gloves and face masks are thrown on the ground rather than in the trash, it clogs the drains and contaminates our lakes, rivers wetlands and other water bodies.

Working for You...Behind the Scenes

When the Pause began and our doors closed in Mid-March, Cooperative Extension staff dispersed to all corners of Saratoga County and a few beyond. CCE staff did not wait; they started working immediately at home while others did essential work in Agriculture, combating Invasive Species and addressing Storm Water issues identified by New York State, and others by Cornell University. Financial operations and the Executive Director joined them continuing to keep the operation functioning.

The virus was threatening when CCE staff completed preparations with Regional IT Specialist Erik Yager creating the ability to work remotely from home offices. Everyone could participate or lead virtual programs or create new classes to keep the business of Cooperative Extension operating. Connectivity enabled staff to complete professional development opportunities. While for others, websites and social media outlets were updated, another created a 2020 CCE/Saratoga Newsletter: a mixture of tradition and 21st century communications. Here are some Cooperative Extension staff who never stopped working for the residents of our county.

SBA PPP – The Small Business Administration's Payroll Protection Program was pursued by CCE Saratoga's Finance Payroll Manager Sharon Bellamy, who took immediate leadership when Congress passed the first PPP grant opportunity. Through her efforts, Saratoga is believed the first CCE Association in Eastern New York to receive funding. Beyond the PPP Grant, Sharon is responsible for maintaining the financial operations of two counties with limited access to her financial offices. The second member of the Finance Office, Accounts Representative Kelly Hurley complimented Sharon's skills while addressing many of the daily operations. The importance of maintaining a healthy finance staff during the Pause cannot be overestimated; they succeeded. With these two professionals the Finance Office didn't miss a beat, even though a whole new financial system is being introduced by Cornell University Cooperative Extension.

Beyond maintaining office operations, the Administrative Team accepted new titles and responsibilities within the CCE/Saratoga Re-Opening COVID-19 Safety Plan. Receptionist Ellie Hackett assumed the duties of Workforce Health Coordinator collecting data submitted by employees and visitors. Social Media Specialist Lia Palermo-Sershen is the head of Online Content Management responsible for all aspects of an extensive social media presence. Bud South, the Training Center Facilities Manager broadened his responsibilities to adapt office spaces and public areas to reflect safety requirements for re-opening. He is currently creating portable wash stations, reducing congestion during forthcoming events at the 4-H/CCE Training Center. His efforts are leading to a seamless reopening process. Bud is assisting with the Farm Sanitizer Distribution efforts. Over 1,000 gallons of sanitizer and nearly a thousand face coverings came from the NYS Fair Grounds for distribution to Saratoga farms and related businesses. Operational efforts at the Training Center continued during this time. Wendy McConkey created a weekly CCE Newsletter bringing the ongoing work of CCE to audiences throughout the Saratoga County and beyond. Wendy's title was expanded to Events Coordinator and Publications. Her efforts have led to enhancing the visibility across the county and across the state highlighting the efforts of ***Those Working for you ... Behind the Scenes.***

Contact Tom Gallagher: (518) 577-0958, tjg3@cornell.edu

CCE of Columbia and Greene Counties, 479 Route 66, Hudson, NY 12534

Contact Evon Antonio: (518) 662-9820 x 111, ea353@cornell.edu

You must register in advance so we can plan on having enough supplies at each pickup point.

Please Register [HERE](#)

(Registration includes contact information, pick up site & estimated quantities requested)

Farmers picking up will need to wear their own face coverings and bring their own pen.

Supplies are Limited.

Actions support NY dairy industry during Dairy Month

Nourish New York initiative has helped redistribute over 5,000,000 pounds of milk

New York State Agriculture Commissioner Richard A. Ball today highlighted several actions the Department has taken in support of New York State's dairy industry throughout Dairy Month, which is celebrated in June, beginning with World Milk Day on June 1. Governor Cuomo's Nourish New York initiative continues to grow and quickly move surplus milk and dairy products to consumers in need. Over 5,000,000 pounds of milk has been moved off the farm during the first several weeks of the program, representing over 1.8 million dollars spent to support dairy farmers. Additionally, Taste NY Markets and Welcome Centers across New York have featured local dairy producers in their regions throughout the month of June and continue to offer different specials on dairy products to encourage consumers to support their local dairies.

Share your farm's adaptations to COVID-19, enter to win \$200

"Smart Solutions" contest is giving \$200 to the farm with the best innovation

This delivery driver from NH sewed buttons on baseball cap for attaching mask straps.

SOURCE: Morning AgClips

Most farmers know how to fix just about anything. It's a daily requirement of the job. So when it comes to adhering to state and CDC interim guidance on COVID-19 prevention in agriculture, we believe many farms have likely come up with smart, practical solutions for getting their job done safely in the midst of an impractical situation.

The "Smart Solutions" contest is giving a \$200 credit card gift card to the farm owner or employee who shares the best tip on how they've adapted, changed or innovated to make their work, workers or workplace safer during the COVID-19 pandemic. The contest is sponsored by the New York Center for Agricultural Medicine and Health (NYCAMH) and the Northeast Center for Occupational Health and Safety (NEC).

Digital options for farmers to apply for CFAP

Online portal, e-signature tool enable producers to apply from anywhere

USDA's Farm Service Agency will now accept applications for the Coronavirus Food Assistance Program (CFAP) through an online portal, expanding the options available to producers to apply for this program, which helps offset price declines and additional marketing costs because of the coronavirus pandemic. FSA is also leveraging commercial document storage and e-signature solutions to enable producers to work with local service center staff to complete their applications from home.

"We are doing everything we can to serve our customers and make sure agricultural producers impacted by the pandemic can quickly and securely apply for this relief program," said FSA Administrator Richard Fordyce. "In addition to working with FSA staff through the phone, email and scheduled in-person appointments, we can now also take applications through the farmers.gov portal, which saves producers and our staff time.".....[read article](#).

Alternative feedstuffs for horses

You may consider alternative feedstuffs due to high hay costs or poor hay availability. When selecting an alternative feed, evaluate the pros and cons, and always work with your veterinarian or nutritionist.

You may pursue an alternative feedstuff for your horse for one of the following reasons.

- High costs or low availability of hay.
- Presence of mold, dust, insects, trash etc. in hay.
- Lack of storage space for hay.
- Poor consistency of hay.

When possible, quality hay should make up a large portion of a horse's diet. However, the following alternatives can replace hay in partial or in whole when needed. Always consider the pros and cons when selecting an appropriate alternative feedstuff for your horse.

Before feeding an alternative feedstuff, consult your veterinarian and equine nutritionist... [read more](#).

Clean, Drain and Dry!

Clean, drain, and dry your watercraft and help protect our waters. If you see a boat steward at a launch, ask them for more information, as they are there to help.

Boat Stewards are environmental educators that work at public launches in the summer months to help educate boaters on the threats of aquatic species pose to our waterways. They also inspect boats upon launch and retrieval for any visible aquatic invasive species.

Common Frog-bit: An invasive Aquatic Plant

European or common frog-bit, also known as *Hydrocharis morsus-ranae*, is a floating perennial aquatic plant that is non-native to our area.

Common frog-bit grows as dense mats that can very easily take over whole waterways and hinders the movement of boats, swimmers, ducks, and large fish through the water.

Not only does this invasive species prohibit movement through various waterways, it also blocks the nutrient and sunlight absorption to organisms living closer toward the bottom.

Identify, report, and clean your watercraft to prevent the spread of non-natives!

Car Seats & Installations

CCE of Saratoga is committed to meeting the needs of county residents during this pandemic. Our Occupant Protection Educator has been working with all of the County Agencies so that those in need of car seats can have their needs met. Many families in Saratoga County are having babies and many children are getting bigger needing a different size car seat. CCE's Occupant Protection Educator has a few options for those families truly in immediate need and we have a set of guidelines for you to follow listed below:

1. Families meeting low income guidelines or that have been financially impacted with job losses, please call your case worker at any Saratoga County Social Service Agency to have a referral sent to CCE. If you do not have a caseworker please call our office at **518-885-8995 x 2228** and leave your name, return phone number and information about your child's height, weight, age, type of vehicle (make, model, year). Your call will be returned and arrangements based on your individual situation will be made to get you a car seat to meet your child's needs and properly installed.
2. If you have a car seat and need help with proper installation, please call our office at **518-885-8995 x2228** and arrangements will be made.
3. CCE can offer virtual installation opportunities and if you are not able to do a virtual installation, we can make an appointment to meet using safety guidelines.

Defensive Driving

The Defensive Driving Program is the NY State approved 6-hour course. This allows the participant to receive an insurance reduction and/or point reduction (when needed). This is not

court mandated although it may be. This class is open to anyone with a valid driver's license. The program is 6 hours of classroom instruction with breaks. The cost is \$40.00 per person, cash, money order or checks made payable to: **CCE of Saratoga**.

INSTRUCTOR: Cynthia Dort- Certified Defensive Driving Instructor

In light of the COVID-19 pandemic, Cornell Cooperative Extension of Saratoga County is working on scheduling dates for Summer 2020. Please check [our site](#), our [social media](#), or call our office for more information. Dates will be posted as they are confirmed.

DATES OFFERED:

Sunday August 16

9:00AM—4:00PM

Tuesday October 6 AND Wednesday October 7

(Must attend both days for completion)

6:00PM—9:00PM

Sunday December 6

9:00AM—4:00PM

As of March 19, 2020, participants are encouraged to email lep77@cornell.edu for reservations. Voicemails left on our office phone will be returned at earliest convenience: 518-885-8995

Upcoming Food Preservation Educational Series via Zoom

Friday, July 17, 11 am

Canning at Home: An Intro to Boiling Water, Steam and Pressure Canning: Learn when and how to use these different canning methods. This class will include a discussion of low acid and high acid canning, plus how to avoid botulism food poisoning.

[Register here](#)

Friday, July 31, 11 am

Quick Pickling: Learn tips and techniques for successful pickling, including making a crisp pickle. This class will cover pickling ingredients, plus the basics of canning in a boiling water bath or steam canner, including equipment needed.

[Register here](#)

Blueberry Lemonade

A refreshing lemonade lower in sugar that will help hydrate you this summer. Our Blueberry Lemonade recipe can be made with either fresh or frozen blueberries which are a high antioxidant super fruit.

Ingredients

- 2 cups fresh blueberries (*see where to pick on pg. 11*)
- 6 cups water
- 2 tablespoons agave nectar
- 1/3 cup freshly squeezed lemon juice
- Mint-garnish

Instructions

1. Combine blueberries and 1 cup of water in blender until liquefied: about 1 min.
2. Using mesh strainer over the mouth of a 2-quart pitcher, pour the blueberry puree slowly to strain. Use a spoon to move puree back and forth over the mesh strainer to drain liquid.
3. Add agave nectar into freshly squeezed lemon juice, stir well.
4. Pour in agave nectar and lemon juice into a pitcher, stir.
5. Add the remaining 5 cups of water to the pitcher and stir.
6. Serve over ice. Add blueberries, thinly slice lemon, or mint for garnish.
7. Store in the refrigerator for 2-3 days.
8. ** Stir lemonade before pouring.

[View step by step photos of recipe and nutrition facts.](#)

Homesteaders & Self-sufficiency

CCE Saratoga educators have created an [educational webpage](#) where people can learn all aspects of becoming self-sufficient and what it means to have a homestead. The informational platform brings together agriculture (Livestock & Animal Husbandry, Food Preservation & Preparation, Hunting & Gathering, and Planting & Growing recourses.

Tips for Gardening - July

Use a soaker hose to water trees. Water slowly and deeply once every other week in the absence of rain. For more information, see our [fact sheet](#) on this topic.

Pinch back mums every 10 days until mid-month. For more information, see our [fact sheet](#) on this topic.

Weed the garden and apply mulch where needed. For more information, see our [fact sheet](#) on this topic.

Read more [Gardening Tips for July](#).

A Pocket Guide to Care and Handling of Fish from Stream

Fish are fun to catch and nutritious to eat. They are high in protein, rich in vitamins and minerals, and low in saturated fat. Fish oils are high in polyunsaturated fats that may function in lowering blood cholesterol.

A 3½-ounce portion of fish (before cooking) provides about half of the daily adult protein requirement and has, depending on the species of fish, only 100 to 150 calories.

Proper handling of fish from the time you catch them until you get them to the table will help maintain optimum eating quality. [Keep the following fish handling tips in mind.](#)

HOMESTEADING Video Series

CCE Saratoga County is pleased to announce a brand new virtual series for Homesteading and Self-sufficiency. This [8-week video series](#) will be hosted on our website with a new video released every Wednesday starting May 13th.

Science Activity Book

The [HEADS IN, HEARTS IN Science Activities book](#) is a 100+ page activity guide for science activities at home. The unit contains such activities as: A Drop of Blood, Baking Soda Fizz, Coin Drop, Dancing Raisins, Fingerprint Fun and Tubs of Butter Fun!, just to name a few.

The Heads In, Hearts In family enrichment program encourages families to use their minds (putting their "heads in") as a tool to expand their knowledge around a variety of topic areas. By creating a shared educational experience, the family unit will work, grow and learn together, putting their "hearts in" to the process.

Buy Local at Farmers' Markets

Each week throughout the growing season, the public can experience the freshest seasonal fruits, vegetables, herbs, bedding plants, perennials and fresh-cut flowers that are grown locally, with many being organic. Crafters offer body botanicals, soaps, fine millinery, pottery, handbags, candles, jewelry, and crafts. The local farms produce cheeses, yogurt, jams, wines, maple syrup, honey, free-range eggs, fish, pork, poultry, and beef, along with specialty foods that will keep you returning again and again for quiches, soups, sauces, breads, pastries, cookies, and barbecue.
